

BASAVALINGAPPA

DevOps Engineer | Linux Administrator | Cloud Engineer (Azure AZ-204 | AWS CLF-C01)

basavalingappateganoor@gmail.com | +91-9663299848 | India

PROFESSIONAL SUMMARY

AZ-204 & AWS CLF-C01 certified DevOps and Cloud Engineer with 2+ years of hands-on experience in Linux administration, cloud infrastructure, CI/CD pipelines, and production application support at Capgemini. Proficient in managing Linux servers (RHEL/CentOS), Azure cloud services, SQL databases, and monitoring tools (Dynatrace, ELK Stack). Experienced in automating deployments, configuring network services (SSH, NFS, Samba, FTP, HTTP), and ensuring 99%+ uptime for critical systems. Strong foundation in shell scripting, system performance tuning, and cloud-native DevOps practices.

TECHNICAL SKILLS

Operating Systems	Linux (RHEL, CentOS, Ubuntu), Windows Server
Linux Admin	User/Group Management, SSH Hardening, LVM, Disk/Swap, NFS, Samba, vsftpd, httpd, Crontab, RPM/YUM, Process & Network Management
DevOps & CI/CD	Git, Shell Scripting, Automation, REST APIs, Infrastructure Support
Cloud Platforms	Microsoft Azure (AZ-204) — App Services, Functions, Storage, Cosmos DB, Service Bus AWS (CLF-C01)
Monitoring & Logging	Dynatrace, ELK Stack (Elasticsearch, Logstash, Kibana)
Databases	SQL (MySQL, SQL Server), NoSQL Basics
Languages	Java (Primary), Shell/Bash Scripting

LINUX ADMINISTRATION SKILLS

- User Administration — user/group creation, password policy management, file permissions (chmod/chown/ACL), sudoers configuration
- Boot & Shutdown — understanding of Linux boot process (BIOS/GRUB/systemd), runlevels, and safe shutdown procedures
- User & Group Management — managing local Linux users and groups, /etc/passwd, /etc/shadow, /etc/group
- Service & Daemon Control — managing and troubleshooting services using systemctl/service, enabling/disabling daemons at boot
- Disk, Partition & Storage — disk partitioning (fdisk/parted), swap space management, Logical Volume Manager (LVM) — PV, VG, LV
- Network Services Configuration — configuring and securing OpenSSH (sshd_config), NFS server, vsftpd (FTP), Samba, and Apache httpd
- Job Scheduling — configuring crontab, managing scheduled jobs using cron/at/anacron
- Package Management — OS installation, software deployment and updates using RPM and YUM/DNF package managers
- Process Monitoring — monitoring and managing Linux processes (top, ps, kill, nice, renice, jobs)
- Network Management — configuring network interfaces (ifconfig/nmcli/ip), routing, DNS, firewall rules (firewalld/iptables)

PROFESSIONAL EXPERIENCE

Capgemini Technologies

Sep 2023 – Present

Software Engineer | Java Developer | Application Support & Cloud

- Developed and maintained scalable Java-based backend applications, ensuring high availability (99%+ uptime) in production environments
- Managed Linux-based application servers — handled user access, service restarts, log monitoring, and OS-level troubleshooting on RHEL/CentOS
- Automated routine operational tasks, deployments, and data processing workflows using Shell scripts, improving team efficiency and reducing manual effort
- Monitored application health and infrastructure performance using Dynatrace; proactively identified bottlenecks and reduced Mean Time to Resolution (MTTR)
- Analyzed and triaged production incidents using ELK Stack (Elasticsearch, Logstash, Kibana) for centralized log aggregation and root-cause analysis
- Designed and optimized complex SQL queries for critical business processes, improving data retrieval performance
- Collaborated cross-functionally with DevOps, QA, and infrastructure teams to resolve incidents within SLA and maintain high system reliability
- Leveraged Microsoft Azure cloud services (App Services, Azure Functions, Azure Storage, Service Bus) for cloud-native deployments, integrations, and automation
- Participated in deployment activities, change management, and post-deployment validation following DevOps/ITIL processes

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (AZ-204)	Microsoft
Oracle Certified Professional (OCP) — Java SE	Oracle
AWS Certified Cloud Practitioner (CLF-C01)	Amazon Web Services

EDUCATION

Bachelor of Engineering — Electrical & Electronics Engineering (EEE)	2018 – 2022
Sharnbasva University, Karnataka, India
